Tilt-or-Lift Forklift Service Lifts

Family of Service Lifts for Fast, Safe and Easy Forklift Maintenance

Tilt-or-Lift, Incorporated, has been the country's leading designer and builder of industrial-vehicle service lifts since 1973. The company grew out of a forklift mechanic's frustration with spending unnecessary hours climbing under forklifts to perform even the simplest tasks. A service lift makes it easy to perform repairs and routine maintenance right in your plant or warehouse, eliminated expensive service calls and lost production time.

Two major differences set Tilt-or-Lift apart from others:

- First, its service lifts are designed specifically for use on industrial vehicles – forklifts, industrial trucks, order pickers, three-wheeled vehicles, personal carriers as well as pickups, vans and other fleet vehicles. This ensures full and easy access to these vehicle's underside components.
- Second, Tilt-or-Lift service lifts use hydraulic technology, not chains, cables or lifting screws. Highly dependable, Tilt-or-Lift's hydraulics are easily repaired by forklift mechanics using standard, readily obtainable parts.

Made in the USA

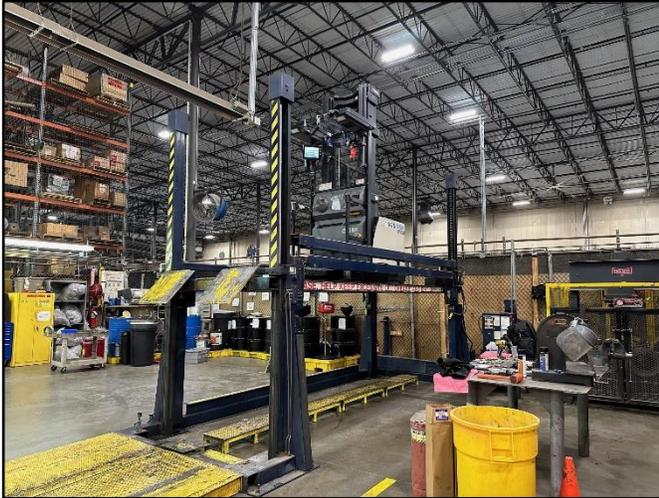

All four service lift models are made in the USA, operate hydraulically, meets all applicable ANSI and OSHA specifications, and incorporate automatic safety features to prevent injury in the event of hydraulic malfunction. All service lifts are shipped assembled and factory tested. Every service lift also comes with a one-year warranty. *Tilt-or-Lift offers customers an annual certified inspection program to ensure their service lifts remain in peak operating condition.*

Lift-A-Lift® Service Lifts

Tilt-or-Lift's largest and heaviest-duty service lift, the Lift-A-Lift® raises forklifts, industrial trucks and motor vehicles up to 40,000# GVW vertically to a height of up to 72". The Lift-A-Lift® is adjustable in width and can be portable.

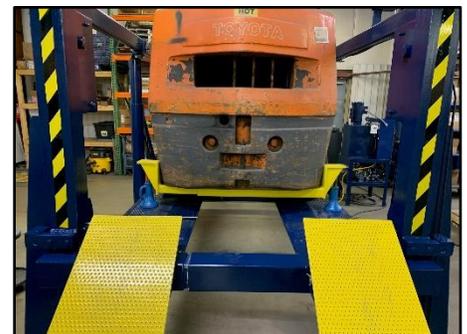

- Available in models to handle 13,000#, 20,000#, 25,000#, 30,000# and 40,000# GVW.
- Width adjusts hydraulically from 56" to 76" except 13,000# and 25,000# GVW lift. (special width are available)
- Minimum ceiling height clearance required is 12'-10"
- Automatic safety features reduce accident risks and automatic leveling device.
- Equipped with removable floor-mounting beam that allows floor access for wheeled tools.
- Optional Equipment Adders:
 - Center Stand (for 3-wheeled vehicles)
 - Transmission Jack Assembly
 - Wheel Removing Device
